ISSN: 1136-4890 (print version)

ISSN: 2340-311X (electronic version, from Vol. 15, 2011)

GENERAL INFORMATION

The European Journal of Anatomy is the property of the Spanish Society of Anatomy (SAE). The journal was established in 1996 and publishes four issues a year.

The journal also publishes a special issue (supplement) with the abstracts presented in the periodical meetings of the Spanish Association of Anatomy (SAE). The Journal also publishes the research material developed by the Trans European Pedagogic Anatomical Research Group (TEPARG).

The home page of the journal is: <http://www.eurjanat.com>. It is an on-line journal that uses a peer-review system for the evaluation of submitted contributions.

The journal adopts, and adheres, to the publication standards established in the "Uniform requirements for manuscripts submitted to biomedical journals", (Vancouver style) 6th edition, prepared by the "International Committee of Medical Journal Editors (ICMJE)", accessible on (<http://www.icmje.org>).

SCOPE AND COVERAGE

The European Journal of Anatomy aims to disseminate results from original research into the following prioritized subject areas:

Animal Models and Veterinary Anatomy

Development

Education in the Anatomical Sciences

Window to the Past (Eponyms, Short Histories and Museums)

Evolutionary and Comparative Anatomy

Gross and Clinical Anatomy

Imaging

Microscopic and Molecular Anatomy

Neuroanatomy

Physical Anthropology

TYPES OF CONTRIBUTIONS

The works must be original, written in English, unpublished and not under consideration for publication in another journal. The author or authors alone are responsible for the claims made in the article. The following types of contributions will be considered for publication:

Original Articles. A scientific study related to any of the research areas listed in the scope. The maximum length of submitted manuscripts is 25 pages, with a bibliography that may not exceed 60 references.

Reviews. A scientific contribution that revisits any research topic that is relevant to those listed in the scope. The maximum length of submitted manuscripts is 40 pages, with a bibliography that may not exceed 100 references.

Case Reports. A summary description of a particular topic of interest related to any of the different research areas in the scope. The maximum length of submitted manuscripts is 10 pages, with a bibliography that may not exceed 20 references.

Face to Face Articles. Such articles enable a discussion of controversial topics. Each topic includes an invited lead paper and comments from two contributors with different viewpoints. Suggestions for possible topics and offers of contributors are welcomed. The maximum length of submitted manuscripts is 20 pages. It must have the structure of a dialogue with references. Figures and tables can be included if their authors consider them necessary to support their article.

News in Anatomy or Anatomical News. These articles inform readers about new scientific advances reported in recently published papers from any peer-reviewed journal. This is a commission-only section. The maximum length of submitted manuscripts should be 10 pages. **It must have not sections** but it could have figures, tables and references if the authors consider them necessary.

Clinical Image. A clinical image contribution consists of a radiology image (normal or variant) with a relevant clinical meaning. The images submitted should not include personal or identifying information of any patient or persons. **It must have the structure** of a brief case report (see above). The maximum length of submitted manuscripts is 4 pages and may include up to 10 references.

Window to the Past (Eponyms, Short Histories and Museums). Pieces on this topic may include a short description of any important contribution that is related to the medical, cultural or social history of anatomy. This could be a short biography of anatomists, relevant persons, or topics related to anatomical museums where the subject has become incorporated in medical or anatomical history. Submissions should include a short description of the historical contribution and significance in the field of anatomy, along with the history of the subject matter. The maximum length of submitted manuscripts is 20 pages and may include up to 15 references. A photograph of the subject and/or images of the most relevant contributions must be supplied.

Letter to the Editor.

Any contribution related with the policy of the journal or relate with previous articles published. They do not usually have figures, tables or references. The word count should be no more than 500 words.
